EXPLANATION OF CHANGES

You are probably aware of the California Energy Commission's (CEC's) recent decision to cancel CaliforniaFIRST (a statewide Property Assessed Clean Energy financing program) due to objections by the Federal Housing Finance Agency. The CEC is deciding how to reallocate the now-available \$30M from CaliforniaFIRST and provide a broader array of financing options for home energy retrofits.

Following their business meeting on August 6, 2010, the CEC released the "[Elements of Energy Upgrade California Program](#)," which is a statewide effort to provide financing for energy retrofits. (See above link for more information.) Elements of this program include:

- A one-stop clearinghouse for alternative financing
- A statewide web portal and branding
- Regional priority for program delivery
- Contractor credentials
- Quality assurance
- Participant recruitment/outreach
- Workforce development
- Loading order
- Multi-family and commercial
- Verification of energy savings and data collection

Some of these elements overlap with the City's current RFP "Scope of Work" for its *Residential Energy Audit and Retrofit Program*. As a result, the City will delay the deadline for its RFP until 5:00pm on October 11, 2010 so that proposers can design/submit a proposal that most effectively leverages all available regional and state home energy retrofit resources and incentives. There will be a Pre-Proposal Conference at 10:30am on September 28, 2010 to discuss how the CEC chose to allocate the \$30M in funding and its potential impact to the RFP Scope of Work.
